Executive Biographies

Nicholas A. Rehm
President

Nicholas A. Rehm, President of Archetto Construction, Inc., has over 40 years of experience in all phases of commercial, light industrial and residential construction. When first entering the construction industry with a degree in Building Trades, he served thirteen years as an apprentice and then as a carpentry journeyman, working for several contractors. Here he gained the knowledge and confidence needed to become an experienced carpenter.

In 1990, Nicholas founded Remick Construction Company. The company began as a subcontractor, specializing in carpentry, rough framing and erection of pre-engineered metal buildings. Through the years Remick evolved into a General Contractor and constructed numerous strip malls, assisted living facilities and customized pre-engineered metal buildings in the New Jersey area.

In 2001, Archetto Construction, Inc. was founded and in his current position as Company President, Nicholas Rehm brings to the company extensive knowledge and experience in the Design / Build and Project Supervision / Execution process.

Brian J. Rehm
Vice President

Brian J. Rehm, Vice President of Archetto Construction, Inc., has over 15 years of experience in Commercial, Light Industrial and Renovation construction. He joined Archetto Construction after graduating in 2004 from Drexel University with a Bachelors of Science degree in Civil Engineering and a minor in Construction Management. In joining Archetto, Brian brought with him the knowledge and ability gained from his Engineering/Construction Management education. Even before entering college, Brian was exposed to the construction industry by working in the family construction business and has continued to apply this knowledge in his current position as lead estimator, Design / Build Lead and in Client Relations

Re: Letter of Reference

To Whom It May Concern,

It is with great pleasure that I write this letter of endorsement, recommendation, approval and reference for Archetto Construction, Inc.

Archetto recently completed an 11,500 square foot one-story complex with our firm for the South Seaville United Methodist Church (SSUMC). This complex involved a totally new-ground-up construction of a large church Sanctuary with balcony, raised alter, vertical platform lift, and a 56' high steeple and bell tower. Also included was a Social Hall capable of seating 180 people for dinners, and capable of conducting a half court basketball venue with 22' high ceilings. A full commercial kitchen, youth activity room and a "quiet room" was appended to the Social Hall. In addition, a fully DCA accredited Day Care center (4 large classrooms) for 56 children was constructed off of a central Narthex as well as central services for 300 occupants.

Archetto performed the project on time (13 months), on budget (\$1,985,000.00) and all with **excellent** craftsmanship, fit, and finish.

Though the client was demanding and mission complicated, Archetto performed all work seamlessly. The whole Archetto team was a pleasure to work with and I hope to have the pleasure again.

Professionally submitted,

James N. Lindemon, RA

Re: Recommendation Letter

To whom it may concern:

Archetto Construction has completed several projects for my firm. They performed in a professional manner providing quality workmanship and completed the project on schedule and within our budget. They also maintained an open line of communication during the entire construction process. I would recommend Archetto Construction to anyone seeking a reputable contractor to provide services to them.

If you need additional information, please contact my office.

Sincerely,

Aldo Falasca
Partner

Vineland, New Jersey 08362
Attention: Sid Brody, Vince Archetto and Nick Rehm

Re: Riverwalk Senior Apartments

Dear Sid, Vince and Nick:

I am writing this letter to thank you for all of the hard work that you did on the Riverwalk Senior Apartments project.

It was a pleasure working with Archetto Construction, Inc. We were really impressed by the professionalism of the people involved in the Riverwalk project, from the principals to the office staff, to the laborers. The construction site was beautifully maintained on a day to day basis. It was very easy to get in touch with someone at Archetto to get a question answered or to deal with an issue that had arisen. The draw process was handled very efficiently with an open line of communication. Indeed, I barely recall a day during construction that went by without communication from Archetto. You have obviously learned over the years that constant communication with development partners on an ongoing basis, while time-consuming, is the best way to keep everyone informed about everything and avoid misunderstandings.

Archetto added value in other ways as well. Your problem solving in the field (and otherwise) was key to getting a challenging job like this one completed. I can still hear Vince telling me that the firm always "runs to its problems", not away from them. You did indeed run to the problems that presented on this job, and thought creatively about them. You presented issues to us along with several potential solutions, prompting the dialogue that resulted in problem solving. Everyone in the firm constantly pitched in, helping us whenever they could.

Once again, thank you for everything. We intend to stay in touch and we wish you the best of everything in your next endeavors.

Sincerely,

A handwritten signature in blue ink that reads 'Mary E. Burgwinkle'.

Dear Vince,

I just wanted to express to you our appreciation for the fine work your firm did in the construction and reconstruction of our offices, recording studio, computer rooms, etc. on the first floor of our International Headquarters.

Bill Sutter, Dee Banse, and Walter Homan all have shared their enthusiasm for your timeliness, responsiveness, and the very professional work which your company performed in connection with the above.

Thanks,

To Whom It May Concern:

I would like to extend on behalf of Sun National Bank a letter of recommendation for Archetto Construction.

This letter is not being written to highlight Archetto's performance on any one particular project but to highlight their performance on several projects of varying degrees of complexity and challenges. Archetto handles each project with urgency and care. Their crews are often working in occupied spaces and under less than ideal working conditions. They maintain a safe and professionally conscientious atmosphere while completing the task at hand in a cost effective and quality manner.

Nicholas Rehm is very hands on and is someone who is willing to be a problem solver. When there are issues he is quick to address them and puts my concerns at ease.

Sun National Bank and Archetto Construction have maintained a client/contractor *and* bank/client relationship for several years and hopefully many more to come. I would welcome any opportunity to speak highly of Archetto and Nick to their future prospective clients.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Mazzagatti", with a long, sweeping underline that extends to the right.

Re: Archetto Construction, Inc.

To Whom It May Concern:

Archetto Construction has completed several projects for Vineland Construction Company and they are currently under contract with us for another project.

Archetto's work is professional and completed on time and on budget. Their professionalism and work ethic make them one of our valued contractors.

I look forward to continuing our relationship in our upcoming projects, and I recommend Archetto Construction to anyone looking for a reputable company to provide services for them.

Atten: Nick Rehm

Re: Office Building Construction, 3739 N. Delsea Drive, Vineland, NJ

Dear Nick,

I would like to congratulate you on the outstanding job you did for me in the construction of our new headquarters building. Besides the overall performance and quality, I would like to thank you for the following items in particular:

- You came in when my original contractor went bankrupt after completing only the initial site work. You were able to get up to speed immediately and I suffered no loss in time OR the original contract amount.
- During your review of the plans, you were able to point out several errors made by the architect and suggestions to improve the plans. Most notable was that the architect had undersized one of the main support beams. Thanks to you we were able to avoid what could have been a serious lack of structural integrity.
- After we started construction, we made a substantial modification to the entrance of the building to change the hip roof to an A roof. You were able to draw upon my sketchy vision and adjust the plans to make that vision a reality. That modification really “makes” this building and gives us the “wow” factor.
- Each one of the above items individually would make justify my recommendation as a building contractor. However, the thing that most impressed me about you, your workmanship and work effort was that you were able to buy into my vision for my building. You quickly were able to tap into my likes and dislikes so that the finished product was EXACTLY what I hoped for, perhaps even more. You recommended a slightly vaulted ceiling in the conference room and an electric winch for the large chandelier in the lobby. You installed extra wide wood trim on the windows and along the floor. I’ll never forget your comment when I complimented you on it. “I started out with the regular width molding, but when I took one look at it I knew you weren’t going to like it so I ripped it out and went and got this.”

Again, thanks for a job particularly well done and best wishes for a long and successful future.

Sincerely,

A-TECH Engineering, Inc

Re: Archetto Construction

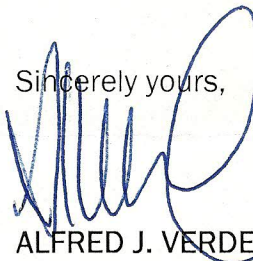

To Whom It May Concern:

This letter is written to express my complete satisfaction with the construction services provided by Archetto Construction Company in the repair and renovation to my business office facade.

The services of Archetto Construction were provided in a professional manner, within the time constraint and within the budget provided by my financial lender. The building is approximately 140 years old and the company provided an array of alternatives and proposals from which to choose throughout the design and construction process.

I have received numerous complements from the general public and would refer and recommend Archetto Construction Company.

Sincerely yours,

ALFRED J. VERDEROSE

Re: Archetto, Inc,
Recommendation Letter

To Whom It May Concern:

This letter is written to recommend and thank Archetto Construction, Inc. for an outstanding job at our Lincoln Avenue, Living Faith Alliance Church location. During the many months of this project from design and negotiation, to completion and our first service, they demonstrated diligence and dedication to completing their work in a timely and professional manner, while working within our budget. The quality of the work and willingness to accommodate our unique needs went beyond our expectations.

Not only did we have Archetto, Inc. build our new sanctuary with our very specific design requests, we enlisted them to remodel and add an addition to our existing facility simultaneously.

On a more personal note, the meetings early on in the process, as well as the weekly contractors meetings later on were productive, professional, and a pleasant experience.

Living Faith Alliance Church would be proud to recommend Archetto Construction and also make available our beautiful and unique facility for those desiring to view their fine work.

Thank you Vince Archetto, Brian Rehm , Nick Rehm , and all your staff. We were blessed by our relationship.

Most Sincerely,

A handwritten signature in black ink, appearing to read "N. Howard", is written over the typed name.

Westfield Architects had the pleasure of working with Archetto Construction in association with the Vineland City Main Street facade program. Specifically, we collaborated with Archetto on the facade rehabilitation of the historic Vederose Building located at 600 Landis Avenue. Nick Rehm excelled in serving as their Project Manager; he and Archetto successfully worked with the property owner to retain the historic storefront and preserve the building's historic fabric.

Archetto Construction did an excellent job in workmanship and client interaction. Without their involvement, the owner would have replaced the building's storefront and covered the upper stories with a brick veneer. Archetto worked with everyone to bring a very successful project to fruition. Of all the properties that participated in Vineland's facade program, the Vederose Building stands apart as the project most in compliance with the Secretary of the Interior's *Standards for the Treatment of Historic Properties*.

We were very pleased with our experience working with Archetto Construction, and would welcome the opportunity to work with them again. Please do not hesitate to call if you have any questions.

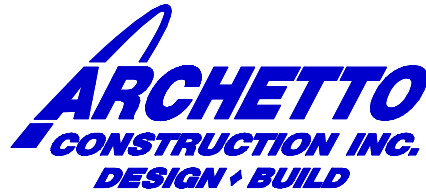

Very truly yours,

Margaret Westfield, R.A.
